

ENTRY FOR CATALOG OF CS HISTORIES

(Our Catalog is designed to provide ready reference to completed segments of the CS History. The simplicity, yet inclusiveness, of the Library of Congress Catalog system provided the model for our card entry. We shall have an alphabetical title card file, as well as an alphabetical card file cross-indexing major geographic areas and subjects treated. Writers of historical papers are being separately referenced in our Roster of CS Historical Writers.)

For each historical paper will you please show:

- I. Exact title
Time span covered
Author and his organizational component
- II. Date of paper; number of pages; security classification
Special attachments, appendices or annexes
When appropriate, relationship to a larger study
Physical location and control of the paper
- III. Major geographic areas covered
Major subjects treated
- IV. Re: Attachment B--Profile of a Historical Paper.
Indicate by letter those segments included in referenced paper. Where known, state what provision can be made to complete the missing segments.
